

## Senior Scientist, Immuno-Oncology

OncoResponse Inc., a Seattle-based privately held immuno-oncology company, has partnered with MD Anderson Cancer Center to deploy a unique and transformational approach to the discovery of cancer therapeutics. OncoResponse is leveraging the human immune system to identify fully human monoclonal antibodies and discover novel targets that will lead to the development of antibody-derived therapeutics for the treatment of cancer, thereby extending the benefit of immunotherapy to a greater number of patients. For additional information, please visit <http://www.oncoresponseinc.com>

We are seeking a highly motivated and innovative immunologist to join our team focused on the development of novel immune-oncology therapies for the treatment of cancer. The successful candidate will have demonstrated an ability to drive scientific excellence and will lead a team to advance our technology platform and support development of antibodies that modulate immune system for the treatment of cancer. The candidate should have a deep understanding of cellular immunology, and/or immuno-oncology, and extensive laboratory experience with development and implementation of in vitro primary immune cell-based assays to support preclinical target validation and guide projects towards clinical development.

### Responsibilities include, but are not limited to:

- Provide scientific leadership within the immunology team and interface with other functional teams to discover novel therapeutics
- Lead a cross-functional team to validate immunology targets and execute comprehensive experimental plans to enable project initiation and progression
- Develop and implement primary immune cell assays for antibody evaluation and specific target validation
- Manage experimental studies and timelines to meet project team deadlines in a fast-paced start up environment
- Work independently, establish strategies, and identify actionable undertakings that drive projects within and outside the immunology team
- Coach and mentor people for performance, scientific advancement and career growth

### Qualification Requirements:

- A PhD degree and a minimum of 4 years of biopharmaceutical experience in immunology, cellular and/or tumor immunology with experience leading and contributing scientifically to discovery research programs
- Strong leadership, interpersonal and communication skills with an enthusiasm for participating in a fast-paced environment characterized by rigorous science and innovative thinking
- Strong hands-on expertise in immunologic assays (immune cell activation, suppression, proliferation, phenotyping, and cytokine analysis) using primary immune cells
- Experienced with engaging and managing external efforts with contract research organizations and academic collaborators

OncoResponse offers a team-oriented, stimulating work environment. Competitive compensation, benefits and stock options are offered. Please email your resume with cover letter to: [careers@oncoresponseinc.com](mailto:careers@oncoresponseinc.com) for consideration.

*OncoResponse is an equal opportunity employer*
